To control most weeds for an extended period of time, non-cropland areas, including parking lots, fence rows, loading ramps, storage yards, tank farms, industrial plant sites. Use to kill weeds which interfere with drainage, create a fire hazard or cause unsightly appearance. Contains a soil sterilant, which will control weeds unsightly appearance. Contains a soil sterilant, which will control weeds up to one year. CAN SPRAYS UPSIDE DOWN ONLY

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**GENERAL WEED CONTROL**

To control most weeds for an extended period of time, non-cropland areas, including parking lots, fence rows, loading ramps, railroad sidings, storage yards, around buildings and industrial plant sites, use 1 can per 65 sq. ft. To control annual weeds and grasses including foxtail, ryegrass, wild oats, crabgrass, cheatgrass, broomedge, ragweed, lambquarter and turkey mullen, apply 1 can per 65-128 sq. ft. For other hard-to-kill perennial weeds and grasses, such as Johnsonsgrass, saltgrass, bermudagrass, kelly green and fescue, apply 1 can per 65 sq. ft.

Remove protective cap. Invert can and point opening in spray tip towards weeds to be sprayed. Depress the thumb on the side of tip and spray weeds thoroughly. Be sure to completely wet weeds. Use in late spring when most weeds have appeared. The amount needed will depend on the area to be covered. Reapply as necessary. Frequency of application will depend on soil type, rainfall and other conditions. One can will treat approximately 50 square feet. For Annual and Perennial Weeds do not apply more than twice a year. Do not apply more than 2.0 lbs ae per acre per application. The minimum retreatment interval is 30 days. For woody plants: Do not apply more than one application per year. Do not apply more than 4.0 lbs ae per acre per year.

**ENTRY RESTRICTIONS**

Do not enter or allow people (or pets) to enter the treated area until dusts have settled. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Spray drift Management: A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of application can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

**Susceptible Plants**

Do not apply under circumstances where spray drift may occur to food, forage, or other plants that might be damaged or crops thereof rendered unfit for sale, use or consumption. Susceptible crops include, but are not limited to, cotton, okra, flowers, grapes (in growing stage), fruit trees (foliage), soybeans, beans and other vegetables, tobacco. Small amounts of spray drift that might not be visible may injure susceptible broadleaf plants.

**OTHER STATE AND LOCAL REQUIREMENTS**

Applicators must follow all state and local pesticide drift requirements regarding application of 2,4-D herbicides. Where states have more stringent regulations, they must be observed.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal. Pesticide Storage: Do not use or store near heat or open flame. Pesticide Disposal: Do Not Burn. Incinerate or burn. Empty spray containers in proper disposal location. Spray containers should not be burned or incinerated. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.
